GEOGRAPHIC AREAS

We are looking for agents in the entire Swiss territory: Italian, French and German.

We will cover expenses and provide good commissions.

INDEPENDENCEKEY PRODUCT

For further info visit www.independencekey.com!

IndependenceKey is the world's first portable hardware cryptographic device.

It encapsulate the state of the art of modern Security technology, providing "military" security level, keeping costs low and being incredibly easy-to-use in order to provide wide protection against piracy.

IndependenceKey offers the chance to protect data of any form (different file types, disks, Cloud space, VoIP phone calls) through reliable, safe and simple-to-use encryption.

Simply plug Independencekey into the computer's USB port and after one simple initialization a safe communication channel, integrated with the operating system, will be created. The device will allow the encryption of files, folders, virtual/remote disks on your PC or Network, as well as the possibility to make encrypted VoIP phone calls in total privacy.

By using IndependenceKey with colleagues, clients and supplier, it is possible to create a protected network, simply and intuitively. It will make the phone call, sharing and working experiences incredibly safer.

PRODUCT TARGET

IndependenceKey is the ideal solution for individuals, professional and small companies who need to protect sensitive data from unauthorized external intrusions, but - at the same time - who do not want to give up on easiness of usage (for them being not technicians or fields experts) nor to the possibility to safely share said information with their clients, partner or suppliers.

In particular, an important target segment are professionals:

- Lawyers
- Accountants
- Notaries
- Auditors
- Freelancers
- Design, project and planning agencies
- ...everyone managing sensitive data who is looking for a solutions in order to protect them from others.

This client category is made of people who rightfully think that sharing sensitive data (via email, cloud, USB keys..) with clients and partners is fundamentals, no matter what they are: budgets reports, reserved projects, strategic plans...

QUANTEC PROFILE

We work in ICT, focusing on Security technologies. Our headquarter is in Chiasso, Switzerland.

In today's data safety, protection and transmission scenarios, Quantec's mission is to produce high-level security products while keeping them simple to use and available to all.

This is the ground where IndependenceKey was conceived, starting from its engineering to its final creation, by following each and every step of its development and production.

GET IN TOUCH WITH

Mr Michele Barbiero: Sales and Marketing Director
@: michele@independencekey.com
Mobile: +41 (0)76 5886 747

PROFILO DEL CANDIDATO

L'Agente di Commercio ideale per la nostra proposizione commerciale è **un agente plurimandatario con forte interesse per prodotti di tipo IT.**

Una conoscenza specifica del mondo della Sicurezza Dati è un titolo preferenziale, ma non un vincolo, in quanto forniremo l'adeguata formazione per poter proporre al meglio i punti vincenti del nostro prodotto.

Quello che possiamo offrire è un prodotto distintivo, che opera in un settore, quello della Sicurezza Informatica, che è di estremo interesse oggi e per il quale alcune categorie di clienti hanno una crescente sensibilità.

AREE GEOGRAFICHE

Ricerchiamo agenti per **la Svizzera tedesca, francese ed italiana.**

Si offre una buona provvigione ed un rimborso spese.

IL PRODOTTO INDEPENDENCEKEY

Maggiori info su www.independencekey.com!

IndependenceKey è il **primo e rivoluzionario dispositivo crittografico HW portatile al mondo.**

Racchiude in sé lo stato dell'arte della moderna Tecnologia di Sicurezza, fornendo livelli di sicurezza a livello "militare", mantenendo costi e facilità d'uso adatti a chiunque manifesti la necessità di proteggere la propria privacy informatica.

IndependenceKey offre la possibilità di proteggere tutti i dati sotto qualsiasi forma (file di ogni tipologia, dischi, Cloud e telefonate) tramite una crittografia affidabile, sicura e semplice da utilizzare.

Basta inserire IndependenceKey nella porta USB del computer e con un'unica e semplice inizializzazione si andrà a creare un canale di comunicazione sicuro integrato con il sistema operativo, che consentirà di gestire con estrema facilità la cifratura di file, cartelle, dischi virtuali e remoti sul PC o in Rete, così come di effettuare telefonate VoIP criptate in totale privacy.

Utilizzando più IndependenceKey con i clienti, fornitori e collaboratori, è possibile creare il tuo Network protetto, in maniera semplice e intuitiva. Questo ti permetterà di lavorare, telefonare e condividere informazioni con loro in totale sicurezza.

A CHI E' INDIRIZZATO

IndependenceKey è la soluzione ideale per privati, professionisti e piccole aziende che necessitano di proteggere le proprie informazioni sensibili da intrusioni esterne non autorizzate, ma al tempo stesso non vogliono rinunciare ad una estrema facilità d'uso (essendo tipicamente non esperti) e alla possibilità di condividere in modo sicuro, ma facile, tale informazione con i propri clienti, fornitori o partner.

In particolare, un segmento target molto importante è quello degli **studi professionali**:

- Avvocati
- Commercialisti
- Notai
- Revisori Contabili
- Liberi Professionisti
- Studi di progettazione e design
- ...E chiunque gestisca dati sensibili o importanti

che desidera rendere protetti dall'accesso di terzi.

Per tale clientela, è fondamentale poter facilmente condividere (attraverso email, cloud, chiavette USB) documenti sensibili con i propri clienti e partner, quali bilanci preliminari, budget, strategie, memorie difensive, progetti riservati, etc.

PROFILO DELL'AZIENDA QUANTEC

Siamo un'azienda operante nel **settore ICT focalizzata sulle tecnologie di Sicurezza**. La sede è a Chiasso, in Svizzera.

Negli scenari attuali in ambito di sicurezza, protezione e trasmissione dei dati, Quantec ha la missione di produrre dispositivi che offrano il massimo grado di sicurezza pur rimanendo semplici, usabili e disponibili per tutti.

Alla luce di ciò abbiamo concepito **IndependenceKey**, dall'idea ingegneristica alla realizzazione concreta, seguendone tutti gli aspetti di sviluppo e produzione.

 Wir fertigen verglaste Brandschutz-Trennwände und Brandschutz-Festverglasungen in den Klassen EI 30, EI 60, EI 90 und EI 120 aus den eigenen geschützten Systemen.
 Für diese Trennwände und Festverglasungen verfügen wir über die ETA-Zulassung „European Technical Assessment“ und die CE Markierung.
 Als Verglasung verwenden wir Produkte der Firma Vetrotech Saint-Gobain AG aus Flamatt.
 Für die Brandschutz-Türen sind die Prüfungen nach EN-Normen in den Klassen EI 30 bis EI 120 in Vorbereitung und werden unser derzeitiges Programm in absehbarer Zeit komplettieren.
 Für den Verkauf suchen wir eine brancheneingeführte Agentur oder einen Agenten, welche/r Kontakte zu Fensterbauern, Ausbaufirmen und Baufirmen hat.
 Bei Interesse senden Sie uns Ihre Bewerbung:
 per Post an:
 W.M.K. SECUR GmbH, Flurstr. 3 - 39035 Welsberg-Taisten (BZ) - Italien
 per Mail an:

Werden Sie Teil unserer Erfolgsgeschichte

Für unseren Produktbereich „Wellness at Home“ suchen wir für die gesamte Schweiz

FREIE HANDELSVERTRETER (M/W)

Passen unsere hochwertigen Aussenwhirlpools und Saunen in Ihr Portfolio und in Ihre Kundenstruktur?

Ihre Kunden sind regional, erfolgreiche, aktive Einzelhändler im Bereich Outdoor Living und/oder Anbieter im privaten Wellness Bereich? Sie betreuen diese Kunden bereits seit einigen Jahren, haben ein gutes Netzwerk und verfügen über die notwendigen Kontakte in diesem Bereich?

Dann freuen wir uns auf Ihre Bewerbung per E-Mail.

FRANCE

ANNONCE AGENT COMMERCIAL SUISSE

Cultisol (7,5 M€ de CA / 40 collaborateurs) est un fabricant de structures souples à base de membranes élastomères pour les applications environnementales, industrielles et du génie civil. Sur le marché Suisse, l'entreprise souhaite commercialiser ses solutions d'étanchéité pour la toiture et les bassins. Dans ce cadre, elle recherche :

Un Agent commercial indépendant (H/F) pour la Suisse Romande et Italophone (*Cantons VD Vaud, VS Valais, NE Neuchâtel, GE Genève, JU Jura, TI Tessin*)

Un Agent commercial indépendant (H/F) pour la Suisse Germanophone (*Cantons de ZH Zurich, BE Berne, LU Lucerne, UR Uri, SZ Schwytz, OW Obwald, NW Nidwald, GL Glaris, ZG Zoug, FR Fribourg, SO Soleure, BS Bâle-Ville, BL Bâle-Campagne, SH Schaffhouse, AR Appenzell Rhodes-Extérieures, AI Appenzell Rhodes-Intérieures, SG Saint-Gall, GR Grisons, AG Argovie, TG Thurgovie*)

Rattaché au service Export et en lien direct avec le Responsable Export, vous développez l'activité en prospectant efficacement une clientèle de marchands de matériaux, d'artisans et d'entreprises du BTP ainsi que de constructeurs de maisons. Ce développement sera renforcé par la visite auprès des prescripteurs (architectes, bureaux d'études, etc). Enfin, vous recrutez, en parallèle, un réseau de poseurs agréés pour les solutions d'étanchéité de toiture, que vous formez à l'utilisation du produit.

De formation commerciale, vous bénéficiez d'une expérience réussie dans le secteur du BTP et avez une forte attirance pour les produits techniques. Vous bénéficiez aussi d'un réseau de contacts bien établis au sein de la clientèle visée.

Au-delà de votre parcours, votre personnalité fera la différence : votre esprit d'initiative, votre indépendance ainsi que votre sens du résultat sont des atouts essentiels pour réussir dans cette mission. Votre parfaite connaissance de la culture et du marché Suisse est un atout indispensable.

Enfin, afin d'assurer une communication parfaite avec la société, vous maîtrisez le français parfaitement.

Merci d'adresser votre candidature en français à l'attention de Manole REGNIER par email à manole.regnier@cultisol.com ou par courrier à l'adresse suivante :

Do you wish that Swiss people are breathing clean air in their homes and in their cars and that they will be healthy? Offer them the best ionizers on the market - IONEX ionizers for home and for car that emit the highest number of negative ions from the unique carbon brush which never emits unhealthy ozone. All dirty particles will be removed by negative ions from the air, and above all, the most dangerous carcinogenic exhaust gases which are constantly gathering in the lungs. By inhalation of negative ions near the carbon brush the symptoms of allergies, asthma and high blood pressure can be reduced and also be cured.

2014103 SLO

We are looking for the business partners who are selling instruments for the health or small home appliances or air condition appliances (because air-condition destroys negative ions). Our cooperation will surely be successful and Swiss people will be grateful to you.

TIK d.o.o.
Proizvodnja medicinskih pripomočkov
5222 Kobarid, Goriška cesta 5b
Slovenija

Company TIK d.o.o. has over 60 years of tradition in manufacturing innovative and high quality medical disposable devices. The greatest potential and advantage of TIK is in its flexibility, traditionally good cooperation with mayor European distributors, favourable geographic location and long-term experience in manufacturing medical disposable devices.

With active product development, production of plastic components, tubing, cannulas, clean room assembly and suitable infrastructure at manufacturing site in Kobarid, TIK is capable of responding to the strictest demands and conditions imposed by the market and quality standard ISO 13485.

Our slogan "**green.touch me tender**" represents our tireless effort of making products which are manufactured from environment friendly materials and are the least painful for the patient as possible.

2014109 SLO

Please see below a list of services which we offer to our business partners and new business opportunities which TIK d.o.o. is looking for:

Agents and distributors to expand distribution network of TIK products.

OEM manufacturing of catheters, tubes, hydrophilic coated catheters, gynaecology needles, puncture sets, etc.

Private label manufacturing (*manufacturing under customer brand name*).

Supply of semi-finished products, such are PVC tubes, in bulk catheters, funnels, etc.

Development and manufacturing of new products in cooperation with 3rd party/customers.

Manufacturing of various plastic components and products with our own extrusion and moulding machines.

For establishing business cooperation or for additional information please feel free to contact us any time on below contact data:

BRIEF INTRODUCTION
OF IONEX AIR IONIZERS

IONEX d.o.o.
Slomškova 25
SI-1000 Ljubljana
Slovenia - EU

The first company was established in 1990. In the beginning we successfully dealt with construction, but in the past several years we have entered into research activities with an emphasis on ionization. For that purpose we established a new company IONEX d.o.o. We realized that in the air of our living spaces there is a chronic imbalance between negative and positive ions, to the benefit of the later. Since there is a shortage of those which are important for our health, we embarked on a lot of research which are still continuing today and which have brought some encouraging results and a great feedback from satisfied customers and patients.

We have obtained patent for this device, which were used as the basis for the production of various products:

- For living areas is suitable the air ionizer IONEX 220V (also named SANOZEN 220V and PRIMUS 110V). It removes all the dirt particles from the air (e.g. bacteria, viruses, cigarette smoke, dust, smell, mite faeces, carcinogenic soot, exhaust, etc.) and so enables 100% clean air.
- For patients with asthma, allergies and high blood pressure diseases we have developed portable IONEX air ionizer which can be carried and plugged in anywhere with 220V or 110V,
- For these patients IONIZING CHAMBER has been developed, due to the negative ions are beneficial to the health and body without side effects. They drastically reduced the level of histamine, which is increased in diseases of asthma and allergies.
- For sportsman we are also developing ionizing chamber (without doping effect) with the intention of improving immune system and vitality for achieving better results.
- AVTON air ionizer has been designed especially for use in cars (12V) and trucks (24V),
- For the air conditioning industry we are producing an ionizing element, which is attached to ventilation flaps in order to enrich the air with the negative ions.
- We have also developed an ionizing element for air conditioning in the automobile industry.
- With the co-operation of medical institutes we have developed ionization for oxygen masks, which are used in the postoperative rehabilitation of cardiac patients on stationary bikes.

Our air ionizers have all the stamps of approval of Slovene institute of Quality and metrology (SIQ, CB, EC, EMC, EMF, IEC EN, LVD, ROHS), and German institute (GS, TUV) and the Institution of the Republic Slovenia for safety in the workplace and Institute of Jožef Stefan. They are made by the best material (ROHS). They are insured by insurance institution for 400.000€.

IONEX has its headquarters in the centre of Ljubljana, Slomškova 25, Slovenia, EU, T: +386 14396980, G: +386 41750367, +386 40191313, www.ionex.si, ionex19@gmail.com.

IONEX – AIR IONIZER FOR THE ROOM

Power consumption: only 1,6 W, mains: 220 V (and 110V), ionizer voltage: 4500 V, total negative ions output: up to $4,5 \times 10^7$ (ions/cm³/sec) and $0,51 \times 10^{13}$ (ions/sec), total coverage: for whole house or apartment, if carrying it from one room to another, effective range: 8 meters, dimensions: diameter: 12 cm, height: 9 cm, weight: 0,54 kg (with the box).

WHY IS THE SLOVENIAN IONEX AIR IONIZER THE BEST IN THE MARKET?

- It is the **strongest** in the market and for that reason the best instrument for relieving the problems with asthma, allergies and high blood pressure disease,
- It is the **smallest** ionizer in the world (12x9 cm; about 0,54 kg), you can easily find a place for it and carry it with you to your work or to holidays – that is very important for people with asthma and allergic disease.
- It is completely **silent** and can be used also during sleeping.
- It emits negative ions by the **carbon brush** which never emits unhealthy ozone.
- Its life period is **more than 10 years**.
- Its **beautiful design** also represents a nice decoration for an apartment.

THERAPEUTIC EFFECT OF THE IONEX AIR IONIZER

Many medical institutes around the world have proven that the negative ions have a therapeutic effect on the human body, they mitigate the symptoms of asthma, allergies and high blood pressure, improve sleep and overall health. Slovenian manufacturer of the IONEX air ionizers goes with its so-called Leonardos method even further – the inhalation of the negative ions directly near the carbon brush has resulted in a complete elimination of symptoms and curing of these diseases after one year of this therapy (references from the users). When the negative ions enter through pulmonary sacs in the lungs into the blood, they reduce the level of histamine, regulate pressure and pulse, lower levels of neuro-hormone caused by stress, regulate thyroid function, improve concentration and productivity, which is especially important for business and learning ability, etc. Cleaning the air with the negative ions is the best way to prevent the accumulation in the lungs, since this is the only method to remove dirty particles smaller than one micrometer from the air, which are being accumulated in the lungs at all times. At the same time the negative ions represent a protection against infectious diseases, because they remove from the air: dust, smoke, allergens, odours, bacteria, viruses, mite faeces, carcinogenic soot, exhaust and other dirty particles. Negative ions also improve the body's natural defence and vitality of the cells. Inhalation of the negative ions is needed every day, preferably 2-3 hours a day when for instance watching TV program, reading or learning. IONEX air ionizer operates completely silently and emits the maximum number of negative ions that enables the healing effects in the body.

WHY IS THE STRENGTH OF THE AIR IONIZER IMPORTANT?

Only a large amount of negative ions can bring to the people with asthma, allergies and high blood pressure beneficial effect in the body and elimination of the symptoms. When the negative ions enter through pulmonary sacs in the lungs into the blood, they reduce the level of histamine, regulate pressure and pulse, lower levels of serotonin H5, neuro-hormone caused by stress, regulate thyroid function, improve concentration and productivity, which is especially important for business and learning ability, etc... Cleaning the air with a large amount of negative ions is the best way to prevent the accumulation in the lungs, since this is the only method to remove from the air dirty particles smaller than one micrometer, which are being accumulated in the lungs at all times. At the same time the negative ions represent a protection against infectious diseases and improve the body's natural defence and vitality of the cells.

WHY IS THE SIZE OF THE AIR IONIZER IMPORTANT?

The advantage of small air ionizer is that you can easily find place for it in the higher position and carry it to work, on holidays, on a trip, to a spa, etc... In order to achieve the small size we have removed all unnecessary components such as filters and fans and impose additional costs to the purchaser. No filter in the world is able to stop particles smaller than 1 micrometer, which are the most dangerous and are constantly accumulating in

the lungs. Only the negative ions can remove dirt particles from the air and force them to the ground. In this state they cannot become airborne again and are not dangerous anymore.

WHY IS THE SILENT OPERATION OF THE AIR IONIZER IMPORTANT?

Loud appliances are always troublesome, especially at night in the bedroom (for patients with allergic, asthma and high pressure diseases an air ionizer has to work all night long), even though the sound is quiet, constant sounds cause stress. Therefore the fans and unnecessary filters are not installed.

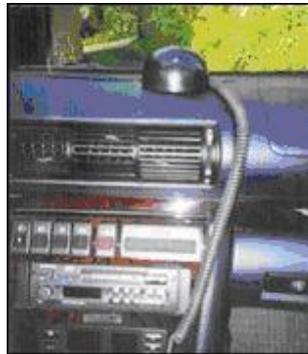

WHY IS A CARBON BRUSH IMPORTANT?

One of the most important characteristics of our IONEX air ionizer is that it emits the negative ions from the carbon brush. Since the carbon brush never emits harmful ozone like ionizers with metal needles or plasma membrane do, the long-term healthy use of the IONEX air ionizer is guaranteed. Element, emitting the negative ions, must be visible on the outside of the ionizer, it may not be placed inside of the ionizer otherwise the negative ions are destroyed on their way towards the exit.

WHY IS A GREAT CAPACITY OF CLEANING IMPORTANT?

In addition to therapeutic effect of negative ions in the body, endorsed by a number of institutes around the world, the air cleaning is the main ability of the IONEX air ionizer. For that reason the air ionizer has to emit the great amount of negative ions. It exploits the chemical properties, since the negative ions bind to the existing floating particles in the air and force them to the ground, from where they can raise no longer. The result is hundred percent clean air and still enough negative ions for beneficial effects on human health. Therefore, the IONEX air ionizer is essential in living and working spaces and your best friend.

AVTON – CAR AIR IONIZER

Power consumption: only 1,3 W, mains: 12 V and 24 V (for trucks), ionizer voltage: 3000 V, total negative ions output: up to $2,7 \times 10^7$ (ions/cm³/sec) and $0,31 \times 10^{13}$ (ions/sec), total coverage: up to 10 m², effective range: 4 meters, dimensions: diameter: 10 cm, height: 5 cm, weight: 0,32 kg.

AVTON is a portable car air ionizer intended to clean dusty and stale air in your car, where the positive ions are highly concentrated with harmful carcinogenic exhaust and fumes. These are to blame for tiredness, drowsiness, slow reactions, and lack of concentration. Air conditioning does not improve the quality of air, since it only cools down the air and besides that it destroys negative ions, too. The only thing that can help is the AVTON car air ionizer which constantly emits negative ions from a carbon brush. With its operation it cleans the indoor air and protects the driver and the passengers from exhaust, fumes and infectious diseases. It is fixed to the dashboard with an adhesive strip and plugged into a car lighter. It uses the same amount of electricity as a clock in the car. It turns on automatically when the car starts.
